Professional Summary

Software engineer with solid JavaScript and React experience plus practical exposure to Arduino-based robotics builds, sensor debugging, and field-test iteration.

Technical Skills

JavaScript, React, Node.js, RESTful APIs, Arduino, Prototype testing, SQL, Documentation

Experience Highlights

- Shipped internal web tools for engineering teams managing prototype runs and maintenance records.
- Supported Arduino robot testing for a student robotics programme, with focus on logging, bug triage, and operator workflows.
- Worked on API integrations and frontend dashboards for field devices reporting sensor values in real time.

Selected Projects

- React quality dashboard for robotics lab checklists and run history.
- REST API for experiment records and device health snapshots.

Education

Bachelor-level Computer Science or Engineering background with project-based robotics, embedded, software, or automation exposure through coursework, competitions, freelance work, or internships.
