

Ryan Wong

Embedded Systems and Automation Developer

Penang, Malaysia | ryan.wong.demo@example.com | +60 11 880 2205
github.com/ryanw-embedded | ryanproto.dev

Professional Summary

Automation developer with embedded software experience on ESP32 platforms, motor control, sensor integration, and practical debugging. Comfortable supporting both firmware and connected software interfaces.

Technical Skills

ESP32, C++, Arduino, Motor and sensor integration, Embedded debugging, React, Node.js, FreeRTOS

Experience Highlights

- Developed ESP32-based automation modules with sensor polling, event triggers, and actuator response logic.
- Built web views for monitoring system state, logs, and deployment notes for field technicians.
- Assisted in prototype assembly, failure analysis, and repeatability testing across multiple device revisions.

Selected Projects

- Factory feeder prototype with motor control sequencing and sensor-based stop conditions.
- Monitoring dashboard for live device telemetry and debugging checkpoints.

Education

Bachelor-level Computer Science or Engineering background with project-based robotics, embedded, software, or automation exposure through coursework, competitions, freelance work, or internships.
