Professional Summary

Junior robotics engineer with hands-on university project experience in line-following bots, embedded C++, and hardware iteration. Strong willingness to grow in production engineering environments.

Technical Skills

Arduino, C++, Prototype testing, Sensor calibration, Documentation, JavaScript, Git

Experience Highlights

- Contributed to robotics competition builds with line detection logic and troubleshooting under time constraints.
- Documented wiring, firmware updates, and track-test observations for student team handovers.
- Created simple JavaScript tools for comparing calibration values and recording repeated test runs.

Selected Projects

- Line-following robot with threshold tuning and repeated course testing.
- Calibration comparison utility for student robotics workshops.

Education

Bachelor-level Computer Science or Engineering background with project-based robotics, embedded, software, or automation exposure through coursework, competitions, freelance work, or internships.
