

# Daniel Lee

## Frontend and Platform Engineer

Singapore | daniel.lee.demo@example.com | +65 9123 2207  
github.com/danlee-platform | danlee.dev

### Professional Summary

---

Frontend and platform engineer with strong React, Node.js, and REST API delivery experience. Limited robotics exposure but solid engineering discipline and shipped product work.

### Technical Skills

---

JavaScript, React, Node.js, RESTful APIs, SQL, Documentation, Linux, Git

### Experience Highlights

---

- Built production web features, admin tools, and API integrations for client-facing education platforms.
- Owned release workflows, issue triage, and documentation for cross-functional feature rollouts.
- Supported simple microcontroller demonstrations during internal hackathons but not core embedded work.

### Selected Projects

---

- Multi-tenant admin panel for configuration, analytics, and support workflows.
- API service for scheduling, reporting, and user access logic.

### Education

---

Bachelor-level Computer Science or Engineering background with project-based robotics, embedded, software, or automation exposure through coursework, competitions, freelance work, or internships.
