Professional Summary

Early-career controls engineer with exposure to simulation tools, documentation, and firmware labs. Good theoretical grounding, lighter real-world deployment record.

Technical Skills

C++, Simulation tools, Documentation, Control systems, Python, Linux

Experience Highlights

- Assisted in simulation-based tuning exercises for autonomous movement coursework.
- Prepared lab notes, test plans, and performance summaries for student projects.
- Worked with Python scripts for data logging and result analysis.

Selected Projects

- Simulation-first robot navigation assignment with path tuning.
- Python data analysis notebook for motor response measurements.

Education

Bachelor-level Computer Science or Engineering background with project-based robotics, embedded, software, or automation exposure through coursework, competitions, freelance work, or internships.
