

Alex Rivera

Senior Backend Developer

Email: alex.rivera@techmail.io | Phone: +1 (555) 432-1098 | Website: github.com/alexrivera-codes

Professional Summary

Highly motivated Senior Backend Engineer with over 6 years of expertise architecting high-performance API services, database structures, and cloud-native solutions. Experienced in developing secure, modular Microservices using Python, FastAPI, and robust PostgreSQL schemas. Skilled in Docker containerization and AWS infrastructure.

Skills & Technologies

Technical Stack: Python, FastAPI, PostgreSQL, Redis, Docker, AWS, gRPC, Microservices, RESTful APIs, Kubernetes, Linux

Professional Experience

Senior Software Engineer (Backend) at *CloudForge Solutions* (2023 - Present)

- Led the redesign of the core billing API using FastAPI, yielding a 45% reduction in request latency and processing 10M+ daily events.
- Designed and implemented high-volume data models using PostgreSQL and optimized complex queries, saving 15 hours of database scaling overhead per week.
- Built secure container orchestration flows using Docker and Kubernetes, migrating 12 legacy services to a unified microservices network.

Backend Developer at *AppStream Labs* (2020 - 2023)

- Constructed backend microservices in Python using Django and Flask, integrating 5+ major payment gateway systems securely.
- Managed Redis caching layers that reduced heavy read query loads on relational databases by 60%.
- Configured and maintained CI/CD automated deployment pipelines targeting AWS ECS.

Education

M.S. in Computer Science - University of Texas at Austin (2020)

B.S. in Software Engineering - Texas A&M; University (2018)
