

Jane Doe

Senior React Developer

Email: jane.doe@reactmail.org | Phone: +1 (555) 123-4567 | Website: github.com/janedoe-ui

Professional Summary

Experienced and detail-oriented Senior React Developer with 6 years of expertise building scalable, premium SaaS dashboard interfaces. Exceptional command of React, TypeScript, Redux, and TailwindCSS. Experienced in setting up clean modular folder structures and responsive typography, with strong open-source contribution.

Skills & Technologies

Technical Stack: React, TypeScript, TailwindCSS, Redux Toolkit, REST APIs, Git, Webpack, CSS Grid/Flexbox, Responsive Design, A11y

Professional Experience

Senior React Developer at SaaSFlow Interfaces (2022 - Present)

- Engineered 50+ reusable high-fidelity React UI components with TypeScript and TailwindCSS, reducing duplicate stylesheet lines by 30%.
- Integrated comprehensive REST API client wrappers with Redux Toolkit for unified application caching and global state management.
- Spearheaded mobile-responsive refactoring, ensuring pixel-perfect layout renderings across 10+ standard viewport devices.

UI Engineer at CoreGrid Software (2020 - 2022)

- Constructed interactive frontend dashboard panels utilizing React, Chart.js, and CSS variables for smooth light/dark theme toggles.
- Maintained Git repository branches and coordinated regular peer code reviews, improving overall product quality and adherence to guidelines.
- Developed mock servers and client-side endpoints to ensure rapid layout validation during early prototyping stages.

Education

B.S. in Information Technology - Georgia State University (2020)
