Professional Summary

Creative and visually-driven Lead Frontend Architect with 7+ years of experience designing premium, responsive web interfaces and design systems. Specialized in React, TypeScript, Next.js, TailwindCSS, and fluid animations using Framer Motion. Committed to accessibility (WCAG), performance optimization (Core Web Vitals), and clean modular engineering.

Skills & Technologies

Technical Stack: React, TypeScript, Next.js, TailwindCSS, Framer Motion, GraphQL, Webpack, A11y (WCAG), Jest, Git, Redux Toolkit

Professional Experience

Lead Frontend Architect at *DesignSphere Innovations* (2022 - Present)

- Spearheaded the development of a Next.js 15 enterprise SaaS dashboard interface, leading to a 32% increase in user retention and premium conversion.
- Engineered a responsive, custom design system using TailwindCSS and TypeScript components, cutting frontend delivery timeline by 40% across 5 product teams.
- Optimized Largest Contentful Paint (LCP) and Interaction to Next Paint (INP) across pages, achieving perfect 100/100 Lighthouse performance scores.

Senior UI Engineer at *PixelPerfect Labs* (2019 - 2022)

- Developed interactive single-page applications in React and TypeScript, leveraging Framer Motion for high-fidelity animations and page transitions.
- Configured Apollo GraphQL query layers that unified communication between complex microservices and UI views.
- Implemented comprehensive unit testing suites using Jest and React Testing Library, boosting code coverage to 92%.

Education

B.S. in Computer Science & Interactive Design - Stanford University (2019)
